24 hour service

- A Supervisor or another employee should accompany you, whenever possible, to the Clinic or Emergency Room or other arrangements should be made. Supervisors should notify Administration Office as soon as possible of an employee needing treatment.
- Ask for a Return to Work (RTW) form or note from the doctor. A copy should be sent or faxed to Nancy at the Administration Office (605-717-1200) and a copy given to your Supervisor. Be sure to inform and discuss with your Supervisor any limitations or restrictions your medical provider may have given you. If you are not able to return to work, contact your Supervisor and the Administration Office as soon as possible.
- Every attempt will be made to provide transitional modified duty assignments to employees who have sustained a work-related injury which prevents them from performing the full range of their regular duties. We believe that modified duty tasks facilitate the transition back to full duty work.
- Please communicate regularly with your Supervisor and Nancy at the Administration Office regarding your injury. Your assistance is vital to this process.
